

Strainers for Membrane Filtration

LKVF Coarse Strainer

Application

LKVF has a wide range of applications where removal of particles from a flow is required, eg. for protection of a pump or other sensible equipment.

Working principle

It is recommended to use the end connection (A) as inlet and the side connection (B) as outlet, see fig. 1. This means that the particles strained off will gather inside the filter element which facilitates cleaning, especially if the handle points downwards or if the strainer is horizontally installed. However, both flow directions may be used as the perforated tube is designed for withstanding the pressure drop for both flow directions. If side connection (B) is used as inlet max. product pressure is 7 bar.

Standard Design

The strainer consists of a casing with inlet and outlet. Inside the casing the filter element is fixed so that the flow is forced through it. This element consists of a perforated tube which is welded to a flange with a handle. This flange fits a ferrule on the casing to which it is clamped.

TECHNICAL DATA

Max. product pressure (A=inlet): 1000 kPa (10 bar)
 Max. product pressure (B=inlet): 700kPa (7 bar).
 Min. product pressure: Full vacuum.
 Temperature range: -10°C to 140°C (EPDM)
 Strainer area:
 25-38-51 mm: 430 cm².
 63.5-76.1 mm: 840 cm².

Strainer area

1"-1½"-2" mm: 66.6 inch².
 2½"-3": 130.2 inch².

Pressure drop / capacity diagram

LKVF with ø2 mm holes in filter element. Medium: water (20°C).

PHYSICAL DATA

Materials

Product wetted steel parts: Acid-resistant steel AISI 316.
 Other steel parts: Stainless steel AISI 304.
 Seals: EPDM rubber.
 Surface finish: Semi bright.
 Material grades Seal of nitrile (NBR) or PTFE

Sizes

25 mm, 38 mm, 51, 63.5 mm and 76.1 mm.

Strainer element perforation mm

d mm	C mm	Perforation
1	2.0	23%
2	3.5	30%
3	5.0	33%

Separate pressure drop/capacity diagrams are available on request.

Ordering

Please state the following when ordering:

- Size
- Connections if not welding ends
- Size of holes in straining element, 1, 2 or 3 mm
- Options
